

MASTER IN

Sustainability, ESG and Impact Innovation

MADRID

At EOI we are committed to conscious leadership: sustainable, digital, diverse, entrepreneurial and transformative. Because in EOI we train in knowledge, but also in values: we pursue the common good, progress and balance between economic and human. We go beyond training. EOI is the impact that our students will have on the planet. They are the ones who will build the future.

Presentation

Do you want to contribute to human development by seeking to relieve poverty, satisfying the basic needs of all people by promoting sustainable economic growth? Then you might want to join the Master in Sustainability, ESG and Impact Innovation program!

The purpose of the program is to prepare a new generation of responsible business and community leaders that will take organizations and policy makers to meeting the global challenges of the 21st century. You will get the experience of top professionals, experts in development, environmental management, sustainability, ESG, and Social Entrepreneurship among others.

The Masters prepares students in leading Sustainable Development Projects; devising Sustainability Strategies in private companies, international organizations, NGOs, integrating social and environmental aspects in their core business; identifying key indicators to evaluate strategies for Sustainability; and developing engagement strategies to effectively communicate with the different stakeholders.

THE LIDER+ PROGRAMME

Workshops on executive skills

Following the 'Learning by Doing' approach, you will acquire executive skills that are essential for the development of your professional career, such as leadership, decision-making, communication, negotiation, etc.

THE DIGIT@LL PROGRAMME

Workshops on Digital Transformation

You will train to become a professional who understands the digital transformation and who can provide leadership on the subject for organizations of all types.

THE SOCIAL.es PROGRAMME

The project carried out by the students must pursue some of the social SDG .
This is a way to learn by helping others.

THE VENTURE LAUNCHPAD PROGRAMME

Master's Degree Final Project

Complete development of an entrepreneurial project, based on the Lean Startup methodology.

Your future

Graduates of the Master in Sustainability, ESG and Impact Innovation program gain skills and competencies that are suitable for posts in a wide range of sectors and organizations both in Spain and internationally, including:

- The private sector, particularly in company departments working on sustainability.
- Consultancy groups working with clients on sustainability issues.
- International and regional development agencies such as the United Nations, World Bank, Development Banks, European Commission, etc.
- Non-governmental organizations (NGOs) working in advocacy, research and campaigning for sustainable development.
- Government ministries and departments working on economic, social and environmental issues, as well as bilateral development agencies.
- Universities and research centers focused on sustainable development issues.
- In some cases students have also established themselves as independent consultants or set up their own small businesses and social enterprises.

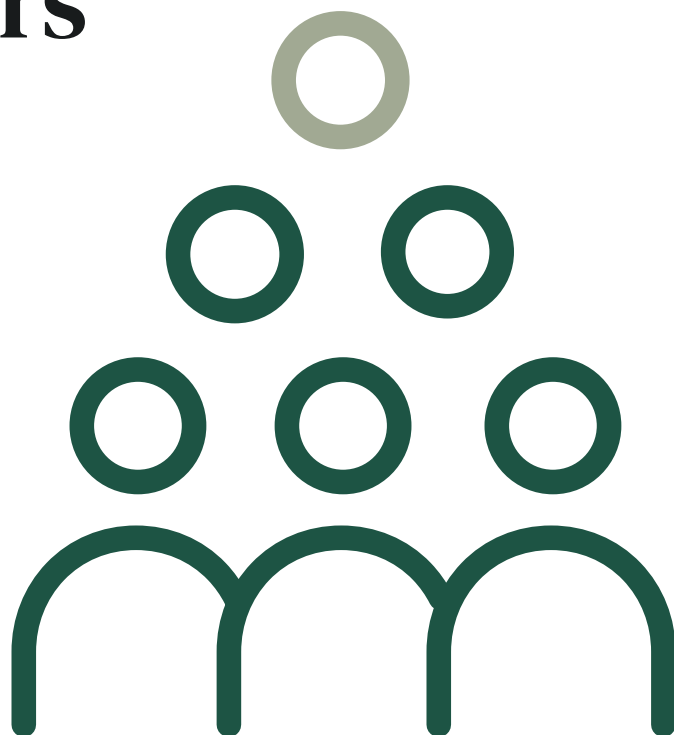

We are with you from the very beginning of the training program for you to develop and strengthen your professional skills to join the labor market. Our careers service will provide you personalized monitoring and employability workshops: CV preparation, group dynamics, improving your personal brand, preparing for job interviews... Furthermore, EOI offers you the possibility to gain practical experience in companies. A number of students have had the opportunity to take up internships after the course with organizations such as: Factor CO2, Repsol, BBVA, KPMG, Banco Santander Telefonica, Allcot, Foretica, Cofides, Attalea Partners, Forética, CO2 Logic, Green Eagle, Pwc or Axa.

Features teachers

In EOI, teachers are a fundamental part of the success of the courses. The cloister is formed by business executives of recognized professional prestige and proven track record in the subject taught, which transmit not only knowledge theoreticians, but also their own experience in the practical application of them.

The teachers will accompany you throughout the learning process and will be at your disposal for questions on any topic of the subjects they teach.

EOI Experience

«The EOI program gave me the chance to know a lot of experts in RSC, met other students with the same concerns about the future and a different way of doing business. I learnt a lot from the teachers, but as an international master my best experience was to learn from my classmates, in a so mix group, with different ages, cultures, life experiences... The school and the EOI employees are great, they always have time to listen to you and help you in everything that they can, you can feel that they have been working there for a long time and they have a lot of experience”

Mario Escamilla Quiles

Product Trainer Grupo TEKA

International Master in Sustainable Development and Corporate Responsibility by EOI

From my personal experience, the “IMSD” year was one of the best years of my life. The experience I went through allowed me to grow not only on a professional level but also on a personal level. The teachers at EOI were our biggest inspiration for our future paths. One of the best advantages of EOI was the networking we were building up for our future careers.
